## What your tasks look like

- Together we will develop and improve the best website creation and publishing tools for SMBs on the market
- You will utilize AI to inject corporate identity into beautiful unique websites
- You will seek for new ways to improve and advance our own CMS and CRM called "James"
- Through continuous observation of our user's behavior you always strive for the best UIs which allows users to operate faster

## Who we're looking for

- You should have at least 2 years of experience in PHP and Symfony
- You fluently speak SQL (MySQL) and have expertise in NoSQL-Databases (MongoDB)
- You have experience with testing environments, e.g. PHP Unit
- You have a passion for UX and UIs and usability and for creating beautiful object-oriented pattern-driven code
- Preferably strong Linux skills and experience in CSS3/SCSS, jQuery, AngularJS, Node.js and Elasticsearch

## What we offer

- You work directly with our founders and get the opportunity to take part in building up our Dev-team
- You have the chance to actively shape our product and create something truly meaningful – for our users and yourself
- Our "we can do it" mindset coupled with our start up style atmosphere allows us to pursue an agile approach and to offer an innovation-friendly workplace
- Free choice of your own working gear
- Prime office location – in the heart of Berlin, where coffee flatrate, fruits and other extras await you

## How your new career starts

If you are ready for this challenge, we would be happy to receive your application including your start date and salary expectations. Any questions? Feel free to contact our Recruiting-Team: [jobs@websitebutler.de](mailto:jobs@websitebutler.de)
